TOMCAT INU

WHITE PAPER | TOMCAT | BINANCE SMART CHAIN

INTRODUCTION

What is TOMCAT Token ?

TOMCAT is a decentralized meme token on Binance Smart Chain which is going to be trended in the crypto world very soon. It will be traded with low fees so that nobody lefts to be involved in this project. TOMCAT is on a mission to bring popular cryptocurrency concepts to the mainstream in one, easy to understand project.

TOMCAT is in it for the long haul. The decentralized community is fostering long-term development of the ecosystem which will result in real use cases, greater rewards and a popularity beyond any temporary trends.

We believe that community is the commerce of the future. Imagine a tokenmunity coming together with the singular common focus of increasing the wealth of everyone involved! The blockchain is the perfect mechanism to allow this to happen. Talk about a dream come true! These are the reasons why we had to create, develop and launch the TOMCAT token

PROJECT & VISION

TOMCAT is not only another meme token, it has multiple great visions to approach the whole crypto world. TOMCAT will make a wonderful history in crypto world because of millions of holders.

TOMCAT Ensuring user choice — adapting to user preferences and giving users decision making power. It's fundamentally about autonomy. Decentralised control looks like end-users having a choice between service providers and not being forced into accepting terms and conditions that exploit them due to a lack of alternatives.

The Great TOM CAT has laboured tirelessly to summon tokenomics that grant the wishes of his faithful followers. TOMCAT offers a selection of delightful tokenomics, both healthy and decadent!

Advantages of the Binance smart chain

Binance smart chain is well known for less gas fee and speedy transactions. It's a sovereign block-chain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.
